TRICKS

PAT-PENDING

is a clever trick: the door slides **showing neither**
the **rail** nor the **wheels** on the floor!

TRICKS system is a new solution for sliding doors fixed to the wall with a concealed gliding application that links a highly functional level with a modern design.

Besides hiding the system, TRICKS allows to create a solution with only 10 mm gap, it slides without any wheels on the floor and ensures its best capacity with a 50 kg door with a dampened door movement both by opening and closing.

1. No wheels on the floor: this solution allows a smooth door gliding regardless the floor type.

2. The system must be simply pre-assembled and the frame must be fixed to the wall: a fast installation without any alignment problems!

3. A crossed cable solution used with the system ensures the door balance is whatever position it may be.

4. TRICKS is a 3D adjustable system: vertical, horizontal and depth (alignment with and distance from the wall).

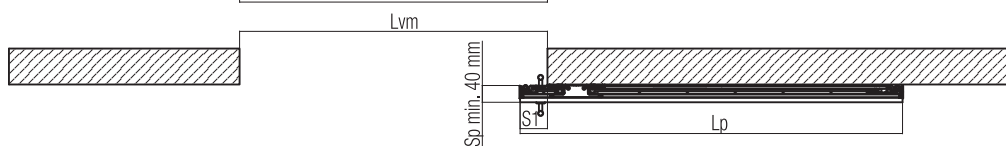

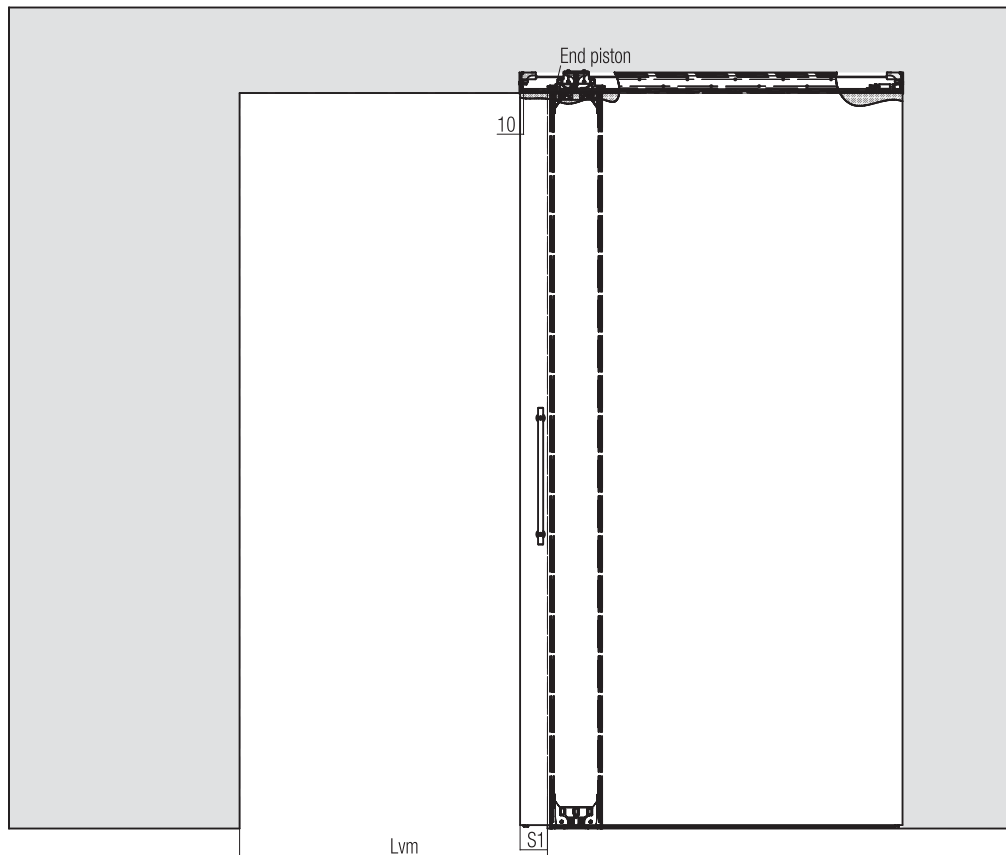

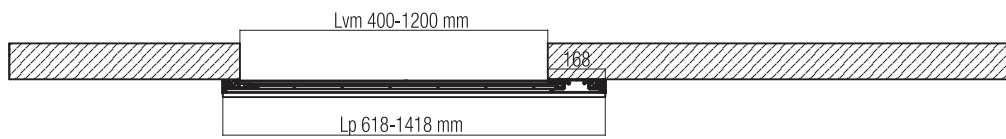

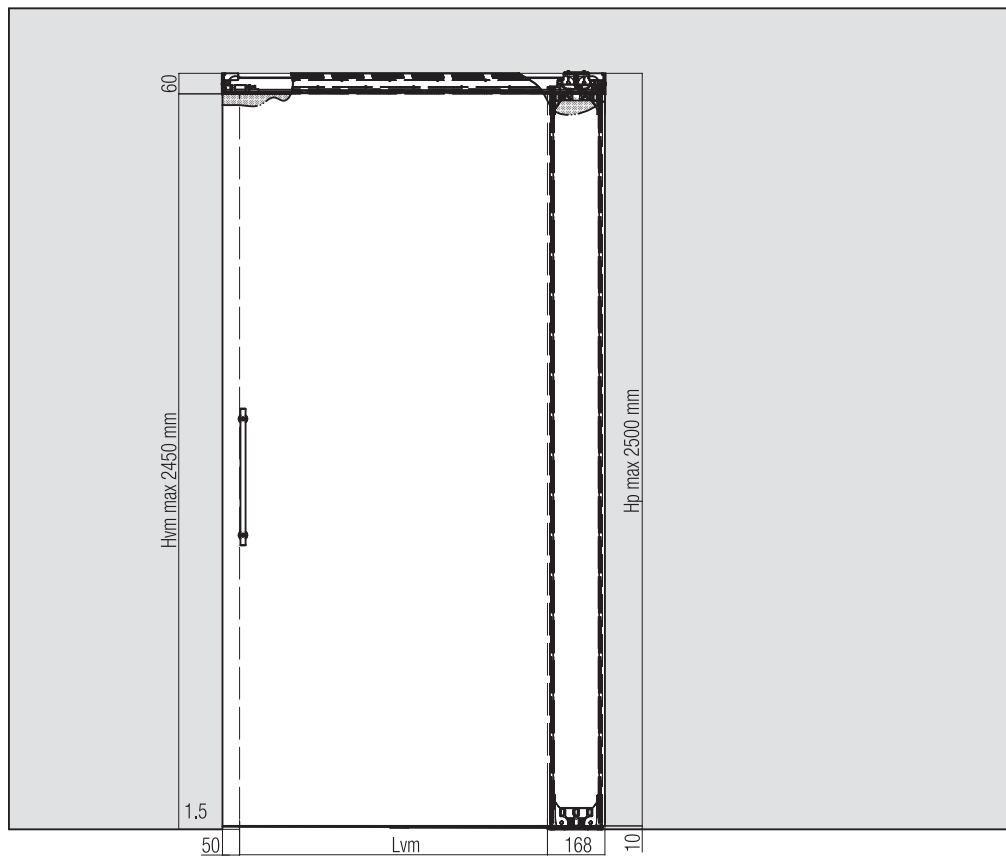

5. A system without wheels allows to install a door of any height and offers a possibility to create various solutions such as cabinet doors, wardrobes, wall niches.

Technical data sheet

- Lvm = wall opening width
- Hvm = wall opening height
- Lp = door width = Lvm + 218 mm
- Hp = door height = Hvm + 50 mm
- Sp = door thickness
- S1 = door ledge for an external handle
