Everyday protection for your valuables

ONE MODEL  
FOR ALL YOUR  
REQUIREMENTS

It is a good idea to lock up jewellery  
and watches whenever you are away  
from home. Cash, cards and ID's should  
also be securely stored out of sight.

A safe is the perfect place to securely store  
all the above. The Pure-Safe series offers a  
good level of protection with a modern  
design that meets an attractive price to  
performance ratio.

Available in a wide choice of sizes and  
locking systems, there is a Pure-Safe model  
to meet your needs. The modern flush  
electronic lock, with either code or  
fingerprint opening are convenient and easy  
to use. The Pure-Safe range is also available  
with the classic double-bit key opening.

Size. Locking system. Freestanding or wall model.

# 23 SAFES: THE CHOICE IS YOURS

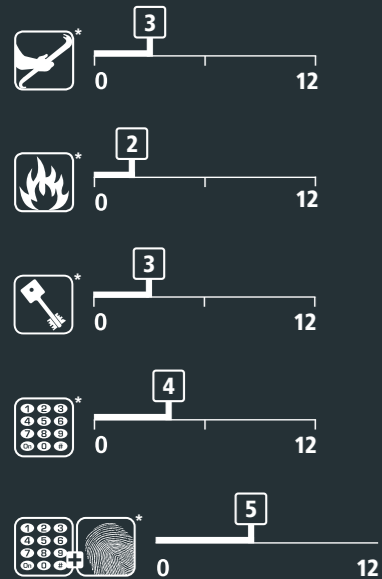

When it comes to size and locking system, everyone has an individual requirement. To help, we have developed a wide range of Pure-Safe options for you. Everything you need to understand which is the right model for you can be found overleaf.

The electronic models feature modern, easy-to-use safe electronics. The keypad is flush with the safe door and responds precisely to code or fingerprint input.

### BURG-WÄCHTER Security Level

Internal Classification\*

### The most important functions and dimensions of the Pure Safe safes at a glance

- Solid single-walled body, double-walled door
- Prepared for wall and floor mounting, (fixing material included)
- Solid protection against break-in attempts

#### Locking systems:

##### Models version E:

Convenient operation due to **motor-driven locking bolts** with **automatic door opening**. Modern, **programmable electronic lock**. Opening with master code or user code. You can change your secret code at any time. Additional mechanical key override lock for emergency opening. Battery operated 1.5 V Mignon (incl. 4 batteries).

##### Models version E FP:

Convenient operation due to **motor-driven locking bolts** with **automatic door opening**. Modern, **programmable electronic lock including reliable fingerprint technology**. **Advantage: Opening the safe via fingerprint is particularly fast and convenient.**

Opening with up to five fingerprints, a master code or user code. You can change your codes and fingerprint users at any time. Additional lock for emergency opening. Battery operated 1.5 V Mignon (incl. 4 batteries).

##### Models version K:

Double-bit key lock and two keys.

## WALL SAFES: DISCREET & SECURE

A hidden wall safe is protected from unwanted attention & offers additional protection from theft.

In the event of a burglary, valuables and important documents will be protected from easy access. A wall safe offers double security. A well-hidden wall safe is not easily discovered by burglars whom are under the pressure of time. Moreover, it is almost impossible to break out of the wall which is firmly set in concrete and the masonry.

With the Pure Safe models there is a choice of six wall safe models. The three sizes are each available with electronic combination lock or the mechanical version with a double-bit key. **Advantage: All models - even those with modern electronic keypad - are flush with the door and do not protrude.** You can use the Pure Safe wall safe flush with the wall and thus optimally behind cupboard doors, mirrors or pictures.

The largest Pure Safe wall safe (PSW 130 E) has a volume of 16.5 litres. Plenty of space for your valuables, documents and personal belongings.

The Pure-Safe models with the flush control panel are now easier to hide in cupboards, behind pictures or built into the wall.
